Manager's Comment

On a month to date basis, the Fund recorded a gain of 0.46%, outperforming the benchmark's return of +0.33%. Since inception, the Fund recorded a return of 93.49% with an annualized return of 3.65%.

Market Review

US Treasuries consolidated in February with the 2-year and 10-year yields ended the month at 4.62% (+41bps MTD) and 4.25% (+34bps MTD) respectively.

Global market continued to consolidate on the back of resilient U.S. economic data as market re-adjusting the expectation of Federal Funds Rate (FFR) cut to 2H2024. Hence, the re-emergence of the narratives "higher for longer" led to global bonds yields rising during the month.

On the domestic front, Malaysia's fixed income market performance was mixed with shorter- and medium-tenured Malaysian Government Securities (MGS) yields rising by around 5-8 bps, while longer-tenured MGS bond yields fell by 1bp during the month. The 3-year and 10-year ending the month at 3.50% (+10bps MTD) and 3.86% (+8bps MTD) respectively.

Market Outlook

During the month, there was no portfolio action. Looking forward, we are looking to tactically add duration for range-bound trading. We will continue to selectively participate in primary corporate bond/sukuk issuances for yield pick up, subject to levels.
